

Réseau Marin Instrumenté en Méditerranée

Technological platform for access to a high-frequency instrumented marine network

- Means to sea (2 oceanographic vessels, diving service)
- Instrumentation (ROV LIRMM, Rosette/CTD, corer...)
- Submarine imaging (photo/vidéo)
- 2 instrumented buoys
- 1km underwater network with two instrumented junction boxes (ADCP, multiparametric probes, HD cameras, sampler, acoustic modems...)

In project : in situ flow cytometry

Activities

- Research
- Observation/Monitoring
- Teaching
- Médiation
- Technological R&D
